School Participation Guide | Academic Year 2015-2016

Web: healthymindsnetwork.org/for-schools/participate
Email: healthyminds@umich.edu
Dear colleague,

Welcome to the *Healthy Minds Study School Participation Guide*! This guide is intended to make your participation in the study as easy and rewarding as possible. The guide explains each step from enrollment to data collection, highlights specific tasks at each step, and provides a general timeline that we will follow together to ensure a smooth participation experience.

By enrolling your institution in HMS, you are joining a group of colleges and universities dedicated to understanding and addressing issues related to student mental health through scientifically rigorous research. The ultimate goal is that HMS data can be used to inform policy and practice on college and university campuses. If you have not already done so, we hope you will join us in our efforts to achieve this goal by enrolling your institution in HMS.

**If you have not already done so, please complete the brief, online enrollment form here:** [https://umich.qualtrics.com/SE/?SID=SV_2aTKJ6wjH3qCUhn](https://umich.qualtrics.com/SE/?SID=SV_2aTKJ6wjH3qCUhn). The purpose of the enrollment form is to collect basic information that will help us facilitate a smooth participation process. Once you submit the form, a member of the HMS research team will contact you directly to discuss next steps.

The HMS research team is deeply committed to strengthening the research-to-practice link. We are continuously refining our efforts to meet the needs of participating schools, and we truly value your input and suggestions. If you have questions or concerns that are not addressed in this guide, please feel free to contact us at healthyminds@umich.edu.

Sincerely,

Daniel Eisenberg, PhD  
Director, the Healthy Minds Network  
Principal Investigator, the Healthy Minds Study  
Associate Professor, University of Michigan School of Public Health

Notes:

- One person on your campus will serve as the *Campus Coordinator*. This guide is written primarily for the Campus Coordinator (“you”). The HMS research team (“we”) will communicate directly with you throughout the preparation, data collection, and data reporting phases.

- Throughout this guide, several tasks are described that require emailing information to the HMS research team. The email address to use for all HMS-related communication is healthyminds@umich.edu.

- The deadlines listed in each section (e.g., two months pre-launch) refer to the timeframe for completing the task. The timeline of these tasks are based on the dates you select for the survey launch. The survey launch date is up to you and should be chosen based on your academic calendar and other campus events.

Acronyms:

- HMS=Healthy Minds Study
- U-M=University of Michigan
- IRB=Institutional Review Board
## Tasks:

*Tasks should be completed by the listed timeframe, though early completion of tasks is advantageous for all involved.*
Section 1. About The Healthy Minds Study

What is The Healthy Minds Study?

The Healthy Minds Study (HMS) is an annual survey-based study examining mental health and related issues (depression, anxiety, substance use) and service utilization among college students. Since its national launch in 2007, HMS has been fielded at over 100 college and university campuses across the U.S., with over 100,000 survey respondents.

What measures are in the Healthy Minds Study?

As of 2015-2016, HMS has moved to a modular format, with modules (sections) covering specific topics (see menu below). Campuses customize the survey by choosing two elective modules to accompany the three standard modules that all campuses cover.

Standard Modules

(1) Demographics
(2) Mental Health Status
(3) Mental Health Service Utilization/Help-Seeking

Elective Modules

(4) Substance Use
(5) Sleep
(6) Eating and Body Image
(7) Sexual Assault
(8) Overall Health
(9) Knowledge and Attitudes about Mental Health and Mental Health Services
(10) Upstander/Bystander Behaviors
(11) Campus Climate and Culture
(12) Competition
(13) Resilience and Coping
(14) Persistence and Retention
(15) Financial Stress
**What are the benefits of participation?**

Participation in HMS brings numerous benefits for participating schools. You will receive a customized data report, access to your data on a user-friendly data visualization site (data.healthymindsnetwork.org), a de-identified individual-level data set, and a customized memo summarizing the economic case for services and programs on your campus based on your data. We are always available to provide research consultation and often organize webinars and other events to promote use of the data. See more about data reporting efforts here: healthymindsnetwork.org/for-schools/data-reporting.

Campus administrators can use the research/data in many ways, including to:

- Strengthen grant applications (e.g., SAMHSA Garrett Lee Smith grants)
- Advocate for mental health services and programs on campus
- Evaluate existing programs (e.g., reductions in stigma following a major campaign)
- Assess need for programs and services
- Raise awareness of mental health and campus resources
- Make comparisons with peer institutions

See more about the benefits of participation here: healthymindsnetwork.org/for-schools/benefits.

**How does the survey work?**

HMS is hosted online and the instrument is maintained and customized by the HMS research team at U-M. Data are securely stored on the HMS servers. HMS is designed to protect the privacy of participants. Students’ personal information is never attached to survey data.

Based on embedded skip logic, some measures are assessed only for students with certain responses to survey items. The HMS survey takes 20-25 minutes and is conducted entirely online. Students may skip any questions that they do not wish to answer.

**How are students recruited to participate?**

Students are recruited to participate via email. Recruitment begins with a brief “pre-notification”. Survey methodologists have concluded that this initial notification can boost participation rates. Two to three days later, students receive their official recruitment email with a link to the online survey. We follow up with reminder emails to non-responders. In total, students may receive up to five emails about participating in HMS over the three-week data collection period. Students who complete the survey, or indicate they do not wish to participate, do not receive any further invitations.
Section 2. Overview of Campus Participation Process

Throughout the preparation phase, there are five simple steps to complete. You are encouraged to complete these steps as early as possible, particularly step 3 (IRB).

<table>
<thead>
<tr>
<th>Steps</th>
<th>Timeframe</th>
<th>Completed?</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) Complete enrollment form and submit payment</td>
<td>Three months pre-launch</td>

</tbody>
</table>

We estimate that completing these steps will take you between five and 10 hours total.
Enrollment Form

If you have not already done so, please complete the brief, online enrollment form here: https://umich.qualtrics.com/SE/?SID=SV_2aTKJ6wjH3qCUhn. You will be asked to provide the following information: name of your school; approximate launch month for survey; how many and which elective modules you plan to include; authorized official at your institution (typically a legal contact authorized to sign for service agreements) and his or her contact information; your contact information; whether you would like to include up to 10 custom questions. Once you submit the form, a member of the HMS research team will contact you directly to discuss next steps.
Section 3. Customization

Time expenditure by Campus Coordinator: 10 minutes - One hour
Deadline: Two months pre-launch

Custom Survey Items

In addition to the standard questionnaire, you have the option to add up to 10 custom items (for a small additional fee, to cover the extra staff time we will need to program the questions and return a data report). We are experienced in survey design methodology and can provide guidance and insight as needed as you create your custom items.

General Tips

- Choose simple words
- Choose as few words as possible to pose the question
- Avoid conversational text—the survey is being read by respondents not to respondents
- Use complete sentences
- Develop response categories that are mutually exclusive
- Be sure each item is technically accurate

Grid style questions (with common response categories and multiple question stems) are common in online surveys. Each row equates to one item (so a grid with 10 rows would use up the allotment of 10 custom items).

Logo

Depending on your institution’s policy regarding logo use, we recommend including your school logo within the HMS survey. This will increase legitimacy for your students. Please check to see if your school logo or seal is available for use. If a school logo is not submitted, the standard HMS logo will be used in its place. Please submit your logo by email.

Recruitment and Reminder Emails

Students are contacted by email to participate in the study. The U-M IRB has approved the recruitment and reminder emails for use at participating institutions. Emails are sent by the HMS research team on behalf of the local contact (typically you, the Campus Coordinator). Please provide the contact information (name, position, email, phone number, campus address) for the local contact. This will increase your students’ understanding that the study is important for their local campus community.

Local Counseling Resources

We are required to display a campus counseling phone number on each page of the online survey. This is a precaution in case a student respondent is distressed and is in need of immediate
resources. Please email us with the name of this provider/resource (e.g., counseling and psychological services, university health services) and the phone number.

Within the HMS questionnaire, participants are asked about resources at your institution that they may have used such as the counseling center and health services center. Please provide us with a list of the three most common places that students may receive mental health counseling or therapy at your institution. This information will be inserted as response categories for the relevant survey items.

In summary, please send us the following by email:

- Up to 10 custom questions (optional)
- Logo
- Campus Coordinator contact information
- Local counseling phone number students can call
- Three most common places students would seek mental health care, counseling, and/or therapy on your campus
Section 4. IRB Content Guide

Time expenditure by Campus Coordinator: 30 minutes-Three hours
Deadline: Two months pre-launch

Participating colleges and universities are required to consult with their campus IRB. You must obtain proof of exemption or approval from your campus IRB. If you do not have an IRB on your campus, we will work with you to arrange an alternative approval process. It is best to start this process right away as approval can sometimes take several months to complete.

Do you need IRB approval?

The main IRB for HMS is maintained at U-M. By the federal definition of research engagement, other participating colleges and universities are “not engaged” in HMS. This does not limit your ability to work with the de-identified survey data or to use the research to inform practice on your campus. It simply means that you are not directly engaging with subjects and are not directly managing sensitive data. The policy is outlined here: www.hhs.gov/ohrp/policy/engage08.html.

The U-M IRB has provided a letter (see Section 11), which clarifies why your campus is not considered engaged in research. We encourage you to show this letter to your campus IRB as soon as possible. We are hopeful that you will be “exempt” from a full IRB review. This will save time and energy for all involved.

If your school determines that you are exempt, you will simply need to submit a letter to us from your local IRB stating that your institution does not consider itself engaged in research and that IRB approval will not be necessary to administer HMS on your campus. Please address this letter to the Principal Investigator (Daniel Eisenberg).

Material Needed to Complete an IRB Application (if applicable)

If your IRB would like to proceed with a review of its own, we have provided information below that will allow you to easily complete the application. You may be eligible for an abridged or expedited IRB process because the U-M IRB has already approved HMS. This may involve submitting an abbreviated form for study approval. Ask your local IRB representative if you qualify for this method of submission or if you will need to complete the full form.

Below are responses to the questions most commonly asked by IRBs. We encourage you to use this material to cut and paste text directly into your IRB forms. If you are able to give the HMS research
team access to your IRB application, we can complete the forms for you. We are happy to help in any way we can. If you or your local IRB have any questions, please don’t hesitate to contact us.

**Project Title**

The Healthy Minds Study

**Overview**

The Healthy Minds Study (HMS) is run by researchers at University of Michigan. The principal investigator is Daniel Eisenberg.

**Objectives and Purpose of Research**

An annual web-based survey, HMS aims to assess mental health status, health behaviors, and health service utilization among college and university student populations. The survey gathers data on the following broad domains: emotional health (e.g., depression, anxiety), resources and support (e.g., knowledge of campus resources/programs, formal and informal help-seeking, barriers to care, satisfaction with therapy/counseling, etc.), academic and social environment (e.g., competitiveness, academic performance, etc.), and overall well-being and lifestyle (e.g., substance use, physical activity, sleep, etc.).

The data can be used to answer several important questions, such as:

- *What percentage of students on campus screen positive for mental health issues?*
- *Which sub-populations are at greater risk?*
- *What is the rate of treatment utilization among students with apparent mental health disorders?*

**Date and Time of Administration**

HMS is administered online, affording students the luxury of taking the survey at any time or place that is convenient to them. This enables them to respond to the survey when they feel comfortable and secure. Respondents further enjoy the option of leaving the survey and resuming from where they left off at any point in the data collection period. HMS is administered over a three-week period. The data collection period is selected to accommodate campus events, breaks, and the administration of other surveys.

**Study Design**

**Survey Instrument.** HMS is administered online. In order to identify the most important issues for examination in HMS, the study’s principal investigators (at University of Michigan) consulted with other experts in the field of college student mental health and reviewed the existing literature on mental health disorders among university students. In developing the HMS survey, the principal investigators used previously validated and widely used instruments wherever possible.
The principal investigators also created new items in order to address issues that have not been addressed in this type of study. Based on embedded skip logic, some of the measures are assessed only for students with certain responses to survey items. The HMS survey takes approximately 20-25 minutes for most students to complete. Students may skip any questions that make them uncomfortable, or that they simply do not wish to answer.

**Eligibility.** All individuals must be currently enrolled as undergraduate or graduate students. The only exclusion criterion is that individuals younger than 18 years old cannot participate in the study.

**Sample.** The Registrar’s Office (or equivalent campus unit) performs a random sampling process to obtain the desired number of students for survey recruitment. For the randomly selected sample of students, the Registrar’s Office provides a file of student information. For all students in the random sample, the following information is collected for the purposes of recruitment, assessment of nonresponse bias, and analysis:

- First and last name
- Email address
- Date of birth
- Sex
- Race/ethnicity
- Citizenship (international student versus U.S. citizen or permanent resident)
- Student status (undergraduate/graduate)
- School/program year
- GPA
- Field of Study

These data are obtained before the recruitment of individual students. The principal investigators are permitted to obtain the administrative data listed above for all students recruited for the study under the guidelines of the Family Education Right and Privacy Act (FERPA). These guidelines allow schools to disclose those records, without consent, to the following parties or under conditions (34 CFR, 99.31) including organizations conducting certain studies for or on behalf of the school. In particular, these studies must help develop, administer, or validate predictive tests, administer student aid programs, or improve instruction. HMS is consistent with these specifications in multiple ways. Most notably, HMS is administering and validating mental health screening tests to see how well they predict academic outcomes. More generally, HMS aims to understand how the learning environment (i.e. academic instruction) can be improved through addressing mental health.

**Recruitment.** Dissemination of the online survey to students is conducted by email. Participating campuses create an institutional email address for HMS. This enhances the legitimacy of the study for students (because emails come from official school accounts—e.g., healthyminds@[school.edu]). Recruitment begins with a brief “pre-notification” email. Survey methodologists have concluded that this initial notification can boost participation rates. Two to three days later, the HMS principal investigators send the recruitment email with a link to the online survey (i.e., data collection begins with the recruitment email), and then follows-up with reminder emails to non-responders (up to three reminder emails in total, separated by approximately five to seven days each). In total, students may receive up to five emails about participating in HMS over the three-week data collection period (see Table 1). Students who
complete the survey, or indicate they do not wish to participate (by emailing the research team to indicate this or not consenting on the consent page of the online survey), do not receive any further invitations. The HMS principal investigators assign a unique survey link to each student in the randomly selected sample. This unique link is piped into the recruitment and reminder emails. The link has no significance outside of HMS.

To send out emails to students on each of the participating campuses, the HMS principal investigators use Emma, a web-based marketing and communications company. Emma’s servers are hosted at the SunGard co-location facility located in Nashville, Tennessee. The facility is staffed 24/7 by certified engineers and only approved staff may gain physical access to Emma’s systems. Identification at this location is verified through a combination of official picture ID and an access code/fingerprint scan combination. Network traffic to and from the facility is routed through a dedicated firewall, and terminal access to the server environment is limited to SSH (secure shell). System administration activities are segregated from database management activities. All passwords on privileged accounts incorporate a high degree of character complexity and conform to internally-set standards. These passwords are also changed on a tri-annual basis. All web-accessible data stored by Emma are housed in a proprietary, closed architecture and 256-bit encrypted using SSL authentication from Digicert. Password access into Emma’s web application is never submitted in clear text. All communications between Emma’s corporate headquarters and SunGard are 3DES/ Ike encrypted. As for list access, Emma’s privacy policy and terms of use clearly outline Emma’s policy; namely, that Emma will never, either during a client’s contract term or at any time thereafter, rent, sell, or otherwise share any client’s list with anyone. Emma does not engage in list rental or purchasing and does not allow rented or purchased lists to be used in conjunction with the Emma service. The full privacy policy is available here: myemma.com/permission-and-privacy-policy?/privacy.

Students voluntarily access the HMS survey via the unique survey link listed in the recruitment and reminder emails. The link takes students to the online survey, where they are presented with the HMS consent form. Students must give their consent in order to progress to the first question in the online survey. The anticipated response rate is approximately ~25% overall, with considerable variation across institutions.
Data. Survey data and respondents’ identifiable information (name, email address) are stored in separate files in separate folders.

Survey data are gathered through Qualtrics, using Transport Layer Security (TLS), encryption (HTTPS), password protection, and HTTP referrer checking. Qualtrics has SAS 70 Certification and meets the rigorous privacy standards imposed on health care records by the Health Insurance Portability and Accountability Act (HIPAA). All Qualtrics accounts are hidden behind passwords and all data is protected with real-time data replication. Only the HMS research team has access to the data through Qualtrics, protected by a password.

If a participating school desires, the principal investigators may follow up with a sub-set of respondents within three years of the original survey administration in order to understand how mental health and service use change over time in the university setting. These issues can only be examined satisfactorily through individual-level longitudinal analysis. Individual-level longitudinal analysis allows the principal investigators to analyze how changes over time relate to specific individual characteristics at baseline as well as changes in individual characteristics over time. The principal investigators may also collect additional academic records such as retention status, which would be linked to the subject data and then stripped of identifiers. The following language is included in the consent form in order to inform participants of this possible collection:

Please note that we might access academic records of students who agree to participate in the survey. We will do this only if your institution decides to conduct an analysis of how the measures from the survey correlate with academic outcomes. In this case, we will use the academic data, stripped of any identifying information, solely for the purpose of this research analysis. The aim of this analysis would be to gain knowledge about how to promote successful academic outcomes. We will protect the confidentiality of these records using the measures described in this document.

The additional academic records and follow-up analysis described above are collected at institutions that request this additional research. Identifiers are destroyed after three years.

Incentives. Students are informed in their recruitment email that they are eligible to win a prize in a sweepstakes to be administered by the HMS principal investigators. Incentives have been shown to improve response rates significantly in survey studies of college students. The prizes total $2,000 (two $500 prizes, 10 $100 prizes). Every student in the initially drawn sample is eligible to win up to one of the prizes, regardless of participation. Subjects are not required to offer something of value (i.e. their participation in research) in order to be entered into the drawing. This means everyone invited to participate in the research is entered into the drawing.

Schools may choose to add additional incentives. If you choose to do so, please inform the HMS research team so we may include this information in the recruitment and reminder emails and gain approval from the U-M IRB.

Informed Consent. Please see Section 10 for the full text of the informed consent.

Obtaining Consent. Consent takes place online, as HMS is an online survey. Subjects who voluntarily visit their unique survey link view an initial screen with the informed consent/assent document. This form is programmed into the beginning of the survey and contains detailed information about the study, confidentiality procedures, the protection of human subjects, and
clearly states that participation is voluntary. Consent is obtained by asking participants to click on one of the following options:

Yes, I am at least 18 years old and I consent to participate in this study.
No, I do not wish to participate in this study and I understand that there is no penalty for not participating.

Students who are 18 but are located in states where the age of majority is over 18 are included in the study. These students are presented with an assent form rather than a consent form on the initial page of the survey. The assent for these participants is delivered in the same manner as the consent process described above. The following change is made to the assent:

Yes, I am at least 18 years old and I assent to participate in this study.

The HMS principal investigator has a waiver of parental permission for those students that reside in states where the age of majority is greater than 18. The study does not pose more than minimal risk to these students, and no more risk than other students aged 18 in states where the age of majority is 18. The research involves no procedures for which written consent or assent is normally required outside of the research context.

**Benefits.** There are a number of potential benefits of this research on the individual-, campus-, and societal-levels. For students, the survey may help to raise their awareness of their own and their peers' relationships with mental health. Resources provided to students by HMS could help improve their well-being or the well-being of their peers. At the campus-level, if the study shows that there is a significant amount of unmet need for mental health programs and resources, then the participating institution can use the study results to help improve services and programs offered to students. Given that issues around mental health impact students' lives, this knowledge should be factored into other campus initiatives (e.g., advising, wellness, health efforts).

At the societal-level, this research will result in peer-reviewed publications, which will contribute to the knowledge-base about college student mental health of which there has been only limited published work. The dissemination of this knowledge could help other colleges and universities utilize a more evidence-based approach in campus health services. Furthermore, improving the well-being of this population is of critical importance given that this is a significant period of psychosocial development. Connecting students with mental health services as needed would have broad effects on future economic productivity, health care spending, and the well-being of young people.

Upon completion of the survey, participants receive a list of helpful resources (local and national) that are programmed into the last page of the survey.

**Risks.** The most significant risk posed by HMS is potential emotional distress to participants. Students may feel upset or anxious when answering questions about personal, sensitive issues. This situation is likely to be infrequent, and the level of discomfort is not greater than that produced by a routine psychological examination.

The consent/assent form warns students that they may feel uncomfortable about some of the questions and that they may skip any question—or decline to participate altogether—with no consequences. It also explains that they will be provided with a list of local and national resources, in case they experience any distress during the survey administration.
The other conceivable risk inherent to participation is breach of confidentiality; however, this is extremely unlikely due to the multiple precautions taken to protect both respondent data and personal information. Students are informed of this unlikely risk before they consent to participate. On a similar note, the study poses negligible legal risks: while students may reveal their participation in illegal behavior (such as underage drinking or illicit drug use), the stringent confidentiality precautions protect their privacy.

**Confidentiality.** There are multiple precautions to protect the confidentiality of respondents, which include:

- Using password-protected, encrypted technology to receive, transmit and store data
- Maintaining separate files for data and respondent-identifying information
- Providing randomly assigned, dedicated, unique survey links to separate data and student identifiers
- Destroying identifying information upon completion of the study or after three years, whichever comes first
- Providing data to institutions without any information that may be traced to individual respondents
- Enforcing a strict non-sharing policy for institutional data: schools have access to only their own data
- Requiring that presentations generated from this research only provide data in aggregate, without reference to individual respondents

HMS is approved by the University of Michigan Health Sciences and Behavioral Sciences Institutional Review Board. Participants and researchers are further protected by a Certificate of Confidentiality from the National Institutes of Health.

Survey responses and respondents’ identifiable information (name, email address) are stored in separate files in separate folders. The two files (identifiable data and survey data) are linkable by the student’s unique survey link. Identifiable data are never merged with survey responses (i.e., this information is always stored in two separate files, the only linking piece of data being the survey links). While the study is in the field, it is necessary to retain all identifying information originally provided by the institution in order to contact non-responders. Once data collection has ended, the HMS principal investigators destroy the contact information of non-responders (name, email address) but retain their other information for the purposes of non-response analysis (date of birth, student status, race/ethnicity, sex, GPA, citizenship, field of study, and school/program year, etc.). The HMS principal investigators retain the full information provided for responders, again with the identifiable data and survey data in separate files in separate folders linkable only by their unique survey link.

Students are not being asked to provide any information that would identify them. In terms of the sensitive questions (those about mental health, and alcohol/drug use), students are told very clearly that they can skip any question that they do not wish to answer. Not a single question on the survey has a forced response (with the exception of the consent/assent page).

*Please let us know if there are issues that your local IRB raises that are not included above. We will improve our material to make the experience that much easier for future Campus Coordinators.*
Section 5. HMS Email Address

**Time expenditure by Campus Coordinator:** 15 minutes  
**Deadline:** One month pre-launch

Recruitment and reminder emails about HMS are conducted by email. To send these emails, we work with *Emma*, a web-based marketing and communications company (http://myemma.com/). You will create an institutional email address for HMS (e.g., healthyminds@school.edu; hms@school.edu). This legitimizes the study for students while abiding by anti-spam/privacy laws. In creating this email account, you will set the forwarding address to healthyminds@umich.edu.

Because setting up this account is a different process at each participating campus, we will work with you individually to accomplish this task.
Section 6. Obtaining a Sample

Time expenditure by Campus Coordinator: 15 minutes
Deadline: Two weeks pre-launch

You will need to work with the appropriate campus unit (typically the Registrar) to obtain the sample file of students. You can either connect us with a contact person at the Registrar’s Office or communicate with the Registrar’s Office directly to obtain the sample. If you obtain the sample directly, we will provide further instructions for transferring the file to the HMS research team.

The following variables are requested, in order to recruit students for the study and to adjust for potential response biases (differences between survey responders and non-responders).

- First and last name
- Email address
- Date of birth
- Sex
- Race/ethnicity
- Citizenship (international student versus U.S. citizen or permanent resident)
- Student status (undergraduate/graduate)
- School/program year
- GPA
- Field of Study

Sampling

Our sampling approach is designed to yield statistically accurate estimates for key measures in the study. HMS can be administered on any campus, regardless of student body size (we have fielded the survey at schools with fewer than 1,000 students and at schools with more than 50,000 students). At institutions with more than 4,000 students, our typical approach is to select a random sample of 4,000 students from the full student population and invite these students to participate in the survey. A sample of 4,000 is generally sufficient for obtaining precise, representative estimates of key measures such as the prevalence of mental health symptoms and service use. At institutions with fewer than 4,000 students, our approach is to invite the full student population to participate. When available, we typically include both undergraduate and graduate students in the sample.

While most schools follow the typical sampling approach, we can try to accommodate special requests when possible. Additionally, some schools (typically those with at least 8,000 students) choose to administer the survey to two or more separate samples of 4,000 students each; in this case, campuses may choose different elective modules for each sample in addition to the three standard modules.
Section 7. Partnerships

1. The Jed Campus Program

The Jed Campus Program (CP) is designed to help colleges and universities promote emotional wellbeing and mental health programming, reduce substance abuse, and prevent suicide among their students. The CP is conducted over four years. During this time, campuses work to identify opportunities to enhance mental health and substance abuse prevention programming. School officials complete confidential, self-assessment surveys on their mental health promotion, substance abuse and suicide prevention efforts.

www.thecampusprogram.org

Participation in the HMS-CP Partnership

Our team has partnered with the CP and is offering a discount to institutions that participate in both initiatives (please see Section #8 for more information about participation fees). Through this partnership, campuses participate in HMS twice over the course of four years (in the first/second year and in the third/fourth year of the CP). These data allow schools to assess systems change (as measured by the CP) and changes in student attitudes/behaviors (as measured by HMS) over time. When implemented together, these initiatives yield a comprehensive approach to using research to enhance campus mental health programs and policies.

2. The Center for Collegiate Mental Health

The Center for Collegiate Mental Health (CCMH) is a multidisciplinary, member-driven, practice research network focused on providing accurate and up-to-date information on the mental health of today’s college students. The collaborative efforts of more than 300 college counseling centers and key partners allows for CCMH to maintain one of the nation’s largest clinical aggregate databases, as well as manage and develop assessments and reports.

http://ccmh.psu.edu

Participation in the HMS-CCMH Partnership

Our team has partnered with CCMH and is offering a discount to institutions that are members of CCMH who participate in CCMH version of HMS (please see Section #8 for more information about participation fees). In this version, CCMH’s CCAPS questionnaire replaces the standard HMS ‘Mental Health Status’ core module.
Section 8. Participation Fee

Time expenditure by Campus Coordinator: 10 minutes
Deadline: Three months pre-launch

How are the participation fees used?

Participating in HMS is a short-term cost for a long-term gain, providing colleges and universities with the data needed to improve student well-being. All participation fees support the work of the Healthy Minds Network and our efforts to improve campus-based mental health research and practice.

Submitting Payment

Payment should be mail to the following address:
The University of Michigan Attn: Patrick Woods
3003 S. State St., First Floor Wolverine Tower
Ann Arbor, MI 48109-1274

Participation Fee Structure

The table below shows the breakdown of participation fees for HMS. The fees are based on institutional size and type.

<table>
<thead>
<tr>
<th>Type of Institution</th>
<th>Standard Fee</th>
<th>Additional Sample Fee</th>
<th>Custom Question Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>Large colleges/universities (≥15,000)</td>
<td>$3,000</td>
<td>$500</td>
<td>$100</td>
</tr>
<tr>
<td>Medium-sized colleges/universities (5,000-14,999)</td>
<td>$2,500</td>
<td>$250</td>
<td>$100</td>
</tr>
<tr>
<td>Small colleges/universities (&lt;5,000)</td>
<td>$2,000</td>
<td>$250</td>
<td>$100</td>
</tr>
<tr>
<td>Community colleges</td>
<td>$500</td>
<td>$100</td>
<td>Free</td>
</tr>
<tr>
<td>HMS-CP partnership (2 surveys)*</td>
<td>$3,000</td>
<td>$250</td>
<td>$100</td>
</tr>
<tr>
<td>HMS-CCMH partnership**</td>
<td>$2,000</td>
<td>$250</td>
<td>$100</td>
</tr>
<tr>
<td>HMS-CP-CCMH opportunity (2 surveys)**</td>
<td>$3,000</td>
<td>$250</td>
<td>$100</td>
</tr>
</tbody>
</table>

The ‘Standard Fee’ includes the three standard modules and two elective modules. If an institution provides two or more samples and adds custom questions, it may field the same batch of custom questions for each sample at no additional charge. If there are two or more batches of custom questions, institutions are charged for each additional batch.
*Institution must be a member of the Jed Campus Program
**Institution must be a member of CCMH**

***Institution must be a member of the Jed Campus Program and CCMH***

---

**Additional Research Opportunities**

Based on our experience conducting the survey on over 100 campuses in recent years, we’ve developed several additional research opportunities. First, in order to examine changes over time, we offer a longitudinal (or repeated measures) option, whereby we conduct the survey two or more times with the same sample of students. This allows for the examination of changes in mental health and other factors within individuals. Second, in order to examine how mental health symptoms predict academic outcomes (GPA and retention), we offer an option to link student survey data with academic records. For example, we can help you link your HMS survey data with grades and persistence/retention, to see how mental health predicts academic outcomes. Please contact us for more information about these additional research opportunities and the associated fees.
Section 9. Frequently Asked Questions

Below are responses to several frequently asked questions.

Q: Will the results from our school be made public?

A: No, data specific to an individual school will not be published anywhere unless that school chooses to do so itself.

Q: Our students already receive so many surveys – won't this burden them further?

A: Keep in mind that on most college campuses (those with enrollment over 4000), only a subset of students will be sampled for HMS. The survey takes ~20-25 minutes for most respondents to complete. Also, we hope you will agree with us that, of the many topics you could survey your students about, the topics covered in HMS are a top priority.

Q: How will you maintain the confidentiality of individual students?

A: Identifying information will only be used to recruit students to the survey. This information will then be stored securely and separately from the response data.

Q: How will you handle cases where students screen positive for mental health issues?

A: At the end of the survey, all respondents will receive a list of local mental health resources, which we will work with you to compile before we field the survey. Students who indicate suicidal thoughts in the recent past or screen positively for a mental health condition (e.g., depression or anxiety) will also be presented with tailored resources and a special note emphasizing the importance of getting in touch with one of the listed resources.

Q: What is unique about this study? Are there others like it?

A: HMS is the only annual survey of college/university populations with a primary focus on mental health and related issues, allowing for substantial detail in this area. The study has a special emphasis on understanding service utilization and help-seeking behavior, including factors such as stigma, knowledge, and the role of peers and other potential gatekeepers. The study allows colleges and universities to examine how mental health symptoms predict academic outcomes (e.g., grade point average and retention), which can be translated into an economic case for mental health services and programs.
Section 10. Research Team

Daniel Eisenberg
Principal Investigator

Daniel is an Associate Professor of Health Management and Policy at U-M and Director of the Healthy Minds Network. He completed a B.A. and Ph.D. in Economics at Stanford University and a postdoctoral traineeship in mental health services and policy research at University of California-Berkeley. His broad research goal is to improve understanding of how to invest effectively and efficiently in the mental health of young people. In recognition of his early career research, in 2010 he was awarded the Thompson Prize for Young Investigators by the Association of University Programs in Health Administration.

Sarah Ketchen Lipson
Co-Investigator

Sarah is a joint degree doctoral candidate at U-M, studying health management and policy at the School of Public Health and higher education at the School of Education. She is also Assistant Director of the Healthy Minds Network. Her research interests center around the mental health of adolescents and young adults, primarily among college student populations. Sarah received her B.A. from Tufts University where she was awarded best honors thesis of the year and graduated with honors. She holds a master’s in higher education from Harvard University and received the School of Education’s Student Leadership Award. Sarah was also a Fulbright scholar before beginning her doctoral training.

J.P. DeWitt
Project Manager

J.P. helps to manage and coordinate the Healthy Minds Network survey studies. This opportunity connects his experience analyzing large surveys to his interests in disability and mental health policy.

Adam Kern
Research Study Coordinator

Adam received his B.A. from U-M in 2014 and graduated with honors. During his undergraduate studies he was a research assistant in a Food Addiction lab, and conducted an honors thesis based on food addiction research. Adam currently serves as a study coordinator for the Healthy Minds Network. In this role, his primary responsibilities include handling survey recruitment, survey dissemination, and data analysis.
Section 11. Forms

U-M IRB Approval Letter

Subject: Initial Study Approval for [HUM00100169]

SUBMISSION INFORMATION:
Study Title: Healthy Minds Study: Module-Based Version
Full Study Title (if applicable): Healthy Minds Study
Study eResearch ID: HUM00100169
Date of this Notification from IRB: 8/31/2015
Review: Full Committee
Initial IRB Approval Date: 5/6/2015
Expiration Date: Approval for this expires at 11:59 p.m. on 5/5/2016
UM Federalwide Assurance (FWA): FWA00004969 (For the current FWA expiration date, please visit the UM HRPP Webpage)
OHRP IRB Registration Number(s): IRB00000246

Approved Risk Level(s):

NOTICE OF IRB APPROVAL AND CONDITIONS:
The IRB HSBS has reviewed and approved the study referenced above. The IRB determined that the proposed research conforms with applicable guidelines, State and federal regulations, and the University of Michigan's Federalwide Assurance (FWA) with the Department of Health and Human Services (HHS). You must conduct this study in accordance with the description and information provided in the approved application and associated documents.

APPROVAL PERIOD AND EXPIRATION:
The approval period for this study is listed above. Please note the expiration date. If the approval lapses, you may not conduct work on this study until appropriate approval has been re-established, except as necessary to eliminate apparent immediate hazards to research subjects. Should the latter occur, you must notify the IRB Office as soon as possible.

IMPORTANT REMINDERS AND ADDITIONAL INFORMATION FOR INVESTIGATORS
APPROVED STUDY DOCUMENTS:
You must use any date-stamped versions of recruitment materials and informed consent documents available in the eResearch workspace (referenced above). Date-stamped materials are available in the “Currently Approved Documents” section on the “Documents” tab.

RENEWAL/TERMINATION:
At least two months prior to the expiration date, you should submit a continuing review application either to renew or terminate the study. Failure to allow sufficient time for IRB review may result in a lapse of approval that may also affect any funding associated with the study.

AMPLMENTS:
All proposed changes to the study (e.g., personnel, procedures, or documents), must be approved in advance by the IRB through the amendment process, except as necessary to eliminate apparent immediate hazards to research subjects. Should the latter occur, you must notify the IRB Office as soon as possible.

AEs/ORIOs:
You must inform the IRB of all unanticipated events, adverse events (AEs), and other reportable information and occurrences (ORIOs). These include but are not limited to events and/or information that may have physical, psychological, social, legal, or economic impact on the research subjects or others.

Investigators and research staff are responsible for reporting information concerning the approved research to the IRB in a timely fashion, understanding and adhering to the reporting guidance (http://medicine.umich.edu/medschool/research/office-research/institutional-review-boards/guidance/adverse-events-aes-other-reportable-information-and-occurrences-orio-and-other-required-reporting), and not implementing any changes to the research without IRB approval of the change via an amendment submission. When changes are necessary to eliminate apparent immediate hazards to the subject, implement the change and report via an ORIO and/or amendment submission within 7 days after the action is taken. This includes all information with the potential to impact the risk or benefit assessments of the research.

SUBMITTING VIA eRESEARCH:
You can access the online forms for continuing review, amendments, and AEs/ORIOs in the eResearch workspace for this approved study (referenced above).

MORE INFORMATION:

Thad Polk
Chair, IRB HSBS
Letter of Non-Engagement from U-M IRB

August 25, 2014

To Whom It May Concern:

The University of Michigan’s Health Sciences and Behavioral Sciences Institutional Review Board (IRB-HSBS) has determined that institutions participating in the Healthy Minds Study (HUM00088494), Principal Investigator, Daniel Eisenberg, are not engaged in the conduct of the research.

The Office of Human Research Protections (OHRP) Guidance on Engagement of Institutions in Human Subjects Research (2008) provides the following definition of engagement in human subjects research:

In general, an institution is considered engaged ... in a particular non-exempt human subjects research project when its employees or agents for the purposes of the research project obtain (1) data about the subjects of the research through intervention or interaction with them; (2) identifiable private information about the subjects of the research; or (3) the informed consent of human subjects for the research. (Section III)

Further, in Section III.B., OHRP provides examples of research activities that do not engage institutions in human subjects research.

B. Institutions Not Engaged in Human Subjects Research

Institutions would be considered not engaged in an HHS-conducted or supported non-exempt human subjects research project...if the involvement of their employees or agents in that project is limited to one or more of the following:

(4) Institutions whose employees or agents:

(a) inform prospective subjects about the availability of the research;

(b) provide prospective subjects with information about the research (which may include a copy of the relevant informed consent document or other IRB-approved material(s) but do not obtain subjects’ consent for the research or act as representatives of the investigators.

(6) Institutions whose employees or agents release to investigators at another institution identifiable private information...pertaining to the subjects of the research.

Based upon this guidance, the IRB-HSBS has determined that institutions participating in the Healthy Minds Study are not engaged in the conduct of the research and therefore does not require IRB approval from participating sites.

We recommend that each participating institution consult with its own IRB as some may have policies that require local IRB review and approval for research conducted with its students.

For additional information or if you have questions, please feel free to contact the IRB-HSBS at (734) 936-0933.

Sincerely,

Cynthia Shindledoecker
Director
Health Sciences and Behavioral Sciences Institutional Review Board
University of Michigan
Certificate of Confidentiality (certificate extended until 2017)

CONFIDENTIALITY CERTIFICATE
MH-06-003A
issued to
University of Michigan
conducting research known as
“The Michigan Healthy Minds Study: Needs for, Barriers to, and Utilization of Mental Health Services by UM Students”
also known as
“The Healthy Minds Study”

In accordance with the provisions of section 301(d) of the Public Health Service Act 42 U.S.C. 241(d), this amended Certificate is issued in response to the request of the Principal Investigator, Daniel Eisenberg, Ph. D. to protect the privacy of research subjects by withholding their identities from all persons not connected with this research. Dr. Eisenberg is primarily responsible for the conduct of this research.

Under the authority vested in the Secretary of Health and Human Services by section 301(d), all persons who:

1. are enrolled in, employed by, or associated with the University of Michigan and its contractors or cooperating agencies, and

2. have in the course of their employment or association access to information that would identify individuals who are the subjects of the research pertaining to the project known as “The Michigan Healthy Minds Study: Needs for, Barriers to, and Utilization of Mental Health Services by UM Students” also known as “The Healthy Minds Study”,

are hereby authorized to protect the privacy of the individuals who are the subjects of that research by withholding their names and other identifying characteristics from all persons not connected with the conduct of that research.

This certificate amends and extends the protections of Certificate of Confidentiality MH-06-003, “The Michigan Healthy Minds Study: Needs for, Barriers to, and Utilization of Mental Health Services by UM Students”. The study is now being conducted at multiple sites.
Page 2 - Confidentiality Certificate

This multi-site research study investigates mental health status, access and barriers to services, utilization of services, social context, academic environment, academic performance, and healthiness of lifestyles in a sample of university students.

A Certificate of Confidentiality is needed because sensitive information about mental health, substance use, illegal activity and psychological well being will be collected during the course of the study. The certificate will help researchers avoid involuntary disclosure that could expose subjects or their families to adverse economic, legal, psychological and social consequences.

All subjects will be assigned a coded number and identifying information and records will be kept in locked files.

This research is underway, and is now expected to end on March 31, 2010.

As provided in section 301 (d) of the Public Health Service Act 42 U.S.C. 241(d):

"Persons so authorized to protect the privacy of such individuals may not be compelled in any Federal, State, or local civil, criminal, administrative, legislative, or other proceedings to identify such individuals."

This Certificate does not protect you from being compelled to make disclosures that: (1) have been consented to in writing by the research subject or the subject’s legally authorized representative; (2) are required by the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.) or regulations issued under that Act, or (3) have been requested from a research project funded by NIH or DHHS by authorized representatives of those agencies for the purpose of audit or program review.

This Certificate does not represent an endorsement of the research project by the Department of Health and Human Services. This Certificate is now in effect and will expire on March 31, 2010. The protection afforded by this Confidentiality Certificate is permanent with respect to any individual who participates as a research subject (i.e., about whom the investigator maintains identifying information) during any time the Certificate is in effect.

Date: September 25, 2007

[Signature]

Patrick Shirdon
Acting Executive Officer
CONSENT FORM WITH SWEEPSTAKES

You have been randomly selected to participate in this online survey from a list of all current students at [name of school]. Participation is completely voluntary and responses are strictly confidential.

Why is this study important?

The purpose of this study is to better understand issues related to students’ well-being, sources of support, use of alcohol and other drugs, and mental and emotional health. This study is important to furthering knowledge about how students are handling the stresses of university life and how well their mental and emotional health needs are being met. Your participation in this confidential survey will provide valuable information that will inform programs and resources on campus.

The Healthy Minds Study is a campus-wide study about student health and well-being. The study has been designed specifically for students, and its success depends on gathering diverse perspectives across campus – therefore your participation, though voluntary, is vital.

*Conditional section*

What will taking this survey be like?

We estimate it will take you about 20 minutes to complete the survey. You will be asked questions about your mood and emotions, mental health and emotional issues you may have experienced, use of alcohol and other drugs, support you may or may not have received, and your academic life.

Additionally, you will be entered into a sweepstakes for one of ten $100 prizes and one of two $500 prizes. All randomly selected students at all participating institutions for this study and a similar study will be eligible to win the prizes, regardless of participation. The sweepstakes will be conducted in June 2016 by researchers at the University of Michigan School of Public Health in Ann Arbor, MI. The chances of winning a prize are approximately 3 in 100,000. Winners will be notified by email and provided with information about how to collect the prize.

*Following statement will always be included in Consent Form*

Your own institution may provide their own incentive as outlined in your recruitment material.

*Conditional section*

The Healthy Minds Study contains a screening algorithm used to identify students with problematic sleep habits. Students who meet a specific threshold may be eligible to participate in a free, online program called Refresh. Refresh has been shown to be highly effective in improving sleep habits. Upon completing the Healthy Minds Study, you may be contacted via email about participating in the program. Participation in Refresh, as in the Healthy Minds Study, is completely voluntary. Your de-identified responses from the Healthy Minds Study will be shared with the Refresh research team.

What if I don’t have time to take the whole survey?

If you aren’t able to take the whole survey at one time, that’s no problem. You may return to this website to continue where you left off.

What are the benefits of participation?

By participating in this survey, you may learn important information about available mental health services. It is anticipated that some students may seek needed services as a result of study participation. This research will be used to gain an understanding of how to best provide such services.

What are the risks of participation?
Some of the questions will ask you about sensitive or personal information such as your emotional health, substance use, and sexual assault. You can skip any questions you do not wish to answer. Even if you decide to participate now, you may change your mind and stop at any time. Upon completing the survey, you will be offered resources and information about the topics addressed throughout. If responding to any questions makes you feel worried or unhappy, we urge you to seek out these resources.

Is this survey confidential?

This survey was designed to protect your privacy and confidentiality. For all randomly selected students at your institution, the [name of school] Registrar’s Office provided basic information necessary to administer the study (name, email address) and to conduct non-response analyses (date of birth, gender, race/ethnicity, citizenship, degree program, year in program, academic major, and grade point average). Even if you do not participate, these data will be stored and used for non-response analyses. Your name and personal information will not be attached to any survey data. Any information that you provide in the survey will be stored in a file that is separate from your name, email address, or any other identifiable information. The data from this study, without any identifiable information, will be retained in a secure repository by the research team for future research purposes. Any reports or articles written about this survey will describe the data in the aggregate (as a whole) and will contain no information that could allow someone to identify you. Participating institutions will receive a de-identified data set and will not be given access to individually identifiable survey data. The Institutional Review Board or university officials responsible for monitoring this study may inspect these records. If you participate in the study, you may be contacted again within three years for one or more follow-up surveys on similar topics. Participating in the current survey does not obligate you in any way to participate in the future. After three years, all identifiable information will be destroyed.

Some schools may request additional analysis on how measures from the survey correlate with academic outcomes. In this case, we will access your academic records stripped of any identifying information, solely for the purpose of this research analysis. The aim of this analysis would be to gain knowledge about how to promote successful academic outcomes. We will protect the confidentiality of these records using the measures described throughout this consent form.

To provide additional protections to your privacy, we have obtained a Certificate of Confidentiality from the National Institutes of Health. With this Certificate, the researchers cannot be forced to disclose information that may identify you, even by a court subpoena, in any federal, state, or local civil, criminal, administrative, legislative, or other proceedings. The researchers will use the Certificate to resist any demands for information that would identify you, expect as explained here. If you indicate you may harm yourself or someone else, we may report this to the authorities. You should understand that a Certificate of Confidentiality does not prevent you or a member of your family from voluntarily releasing information about yourself or your involvement in this research. If an insurer, employer, or other person obtains your written consent to receive research information, then the researchers may not use the Certificate to withhold that information.

Who’s doing this study?

This study is being conducted by the Healthy Minds Study research team at University of Michigan's School of Public Health and [local school contact name] at [name of school].

What if I have questions about the survey?

If you would like to learn more about the Healthy Minds Study, you can visit http://healthymindsnetwork.org/hms.

If you have any questions, comments or concerns, you can contact the researchers at healthyminds@umich.edu. You may also contact the principal investigator of this study, Daniel Eisenberg at daneis@umich.edu, or [local contact name, email address, phone]. If you have questions about your rights as a research participant, or wish to obtain information, ask questions or discuss any concerns about this study with someone other than the researchers, please contact the University of Michigan Health Sciences and Behavioral Sciences Institutional Review Board, 2800 Plymouth Rd. Building 520, Room 1169, Ann Arbor, MI 48109-2800, (734) 936-0933, irbhsbs@umich.edu.
Pre-notification, Recruitment and Reminder Emails (5 total):

Recipients for email #1 (Pre-notification) & email #2 (Recruitment):

- Full random sample from each participating institution
  - Sample comprised of:
    - Current degree-seeking undergraduate and graduate students (when applicable)
    - At least 18 years old

Recipients for emails #3-5 (Reminder #1-3):

- Students in the sample who have not yet responded
  - The researchers will eliminate students who have responded either by completing the survey or indicating that they are not willing to participate by clicking “No, I do not wish to participate in this study and understand that there is no penalty for not participating.”

Fields to be filled in (in blue on the following pages):

Name of school

Student’s first name

Unique survey link assigned to each student

Local contact information

Information about emails:

Emails come from healthyminds@[school].edu.

The alias email account at each participating institution forwards to healthyminds@umich.edu. All email sent to healthyminds@[school].edu automatically come to healthyminds@umich.edu.

Participating institution contacts set up the alias email account (one per school), giving the researchers permissions. Details are provided elsewhere about this process and why it is essential to have @school.edu email alias to send large numbers of emails to randomly sampled studies while abiding by anti-spam and privacy policies.

In the case that schools are unable to create an email address for HMS, the research team creates an account ending in @umich.edu (e.g., SchoolHealthyMinds@umich.edu) and will follow the exact same emailing procedures outlined throughout this document and elsewhere.
Email #1: Pre-notification

SUBJECT: Announcing the Healthy Minds Study at [name of school]

Hello [name],

[name of school] is conducting a campus-wide survey about student health and well-being, called the Healthy Minds Study. You have been randomly selected to participate in this confidential online study. The purpose of this study is to better understand student mental health and related issues (e.g., sleep habits, use of alcohol and other drugs, experiences of sexual assault, etc.) and sources of support. The Healthy Minds Study was designed specifically for colleges and universities, and its success depends on gathering the diverse perspectives of students across campus – therefore your participation is key. By participating, you will be providing [name of school] with valuable information that will improve student life.

You will receive more information in the coming days including a link to the online survey.

Thank you for considering this important study!

[local contact person’s name, affiliation, email address]

The Healthy Minds Study Team

University of Michigan

healthyminds@umich.edu
Email #2: Recruitment

SUBJECT: [name], help improve the lives of college students

Hello [name],

[name of school] is conducting a campus-wide survey about student health and well-being, called the Healthy Minds Study. The purpose of this study is to better understand student mental health and related issues (e.g., sleep habits, use of alcohol and other drugs, experiences of sexual assault, etc.) and sources of support. You have been randomly selected to participate and we’re excited to hear from you.

The online survey takes about 20 minutes to complete – a perfect study break! **Plus you will be entered into a sweepstakes for one of multiple prizes totaling $2,000.** [In addition, you are eligible for a random drawing for the following prizes, which will be given to students at [name of school]: list prizes].

To participate now, follow the link below:

[unique survey link]

The Healthy Minds Study was designed specifically for colleges and universities, and its success depends on gathering the diverse perspectives of students across campus – therefore your participation is key. Please take the time to complete this important survey. By participating, you will be providing [name of school] with valuable information that will improve student life.

Thanks in advance for your participation!

Email #4: Reminder #2

Subject: [name], your participation is needed in the Healthy Minds Study!

Hello [name],

There’s just 1 week left to participate in the Healthy Minds Study, [name of school]’s campus-wide survey of student health and well-being. The purpose of this study is to better understand student mental health and related issues (e.g., sleep habits, use of alcohol and other drugs, experiences of sexual assault, etc.) and sources of support.

We need your perspective and hope that you will take 20 minutes to complete the confidential online survey! By doing so you will be providing [name of school] with valuable information that will improve student life. **Plus you will be entered into a sweepstakes for one of multiple prizes totaling $2,000. [In addition, you are eligible for a random drawing for the following prizes, which will be given to students at [name of school]: list prizes].**

To participate now, follow the link below:

[unique survey link]

Thank you, [name]!

Email #5: Final reminder

Subject: [name], just a few days left to participate in the Healthy Minds Study!

Hello [name],

There’s just a FEW DAYS left to participate in the Healthy Minds Study. The purpose of this study is to better understand student mental health and related issues (e.g., sleep habits, use of alcohol and other drugs, experiences of sexual assault, etc.) and sources of support. We need your perspective to get a more representative picture of the student population, so that we can improve services and programs.

We hope that you will take 20 minutes to complete the confidential online survey! **Plus you will be entered into a sweepstakes for one of multiple prizes totaling $2,000.** [In addition, you are eligible for a random drawing for the following prizes, which will be given to students at [name of school]: list prizes].

To participate now, follow the link below:

[unique survey link]

The survey will be open through [day of the week], [month, day, year]. This is the final reminder email. We hope you will take the time to participate in this important study. By doing so you will be providing [name of school] with valuable information that will improve student life.

Thanks in advance for your participation!

[local contact person’s name, affiliation, email address]

SERVICE AGREEMENT

This Service Agreement ("SA") is for use when The Regents of the University of Michigan ("UM") is providing any of the services, including but not limited to, consulting or testing services, as set forth in the Schedule(s) of Services a copy (or copies, as applicable) of which is attached hereto as Exhibit A for the party signing this SA (hereinafter "Customer"). It will become effective between UM and Customer as of September 1, 2015. By its authorized signature below, Customer hereby agrees to the following terms and conditions:

1. The Customer may transfer to UM tangible research material for use under this SA ("Research Material").

2. Any Research Material provided by Customer will be used by UM under the direction of Daniel Eisenberg solely to perform the services designated in Exhibit A to this SA ("Services") the contents of which are expressly incorporated herein. All services performed hereunder shall utilize only methodologies, which are published or otherwise in the public domain.

3. Research Material furnished by Customer under this SA is and shall remain the sole and exclusive property of Customer. This SA and supply of such Research Material by Customer shall not be deemed to grant UM any rights, expressed or implied, in such Research Material.

4. The Customer certifies and represents that it has collected the Research Material and is making it available to UM in compliance with any applicable institutional review process and relevant laws and regulations. UM certifies it will use the Research Material only in conjunction with the Statement of Work designated in Exhibit A.

5. The Services designated in Exhibit A shall be provided in exchange for consideration of the amount listed in each Purchase Order or other written request issued by Customer in accordance with the rates established in Exhibit B and any subsequent updates of Exhibit B and payable by Customer to the Regents of the University of Michigan. Customer acknowledges that money paid under this Agreement will be comingled in a general fund and UM will not provide an accounting to Customer. PLEASE NOTE: Customer must provide a valid Purchase Order or other written authorization to commence performance of Services requested hereunder. The amount specified in the Purchase Order or written authorization must be sufficient to cover the total cost of the Services requested, as set forth in Exhibit B. If Customer wishes to be invoiced, Customer shall provide invoicing information in the PO or to the PO Contact herein.

Purchase Orders shall be sent to: The University of Michigan
Attn: Julie Olivero
3003 S. State St., 1st Floor Wolverine Tower
Ann Arbor, MI 48109-1274
734-764-4177
jolivero@umich.edu

Purchase Orders shall Reference: 15-PAF05940

Notwithstanding any terms and conditions to the contrary contained on any such Purchase Order or other written request, this Service Agreement constitutes the entire agreement of the parties and all terms and conditions contained on any such Purchase Order form or other written request issued pursuant to this SA are null and void.

6. Customer acknowledges that the Services are not performed under Good Laboratory Practices as that term is defined by federal regulations. Customer hereby assumes all risk associated with (i) the provision of Research Material(s), if any, to UM, (ii) performance of Services by UM and (iii) use of results of said Services by Customer and those obtaining such results from Customer. The parties hereby agree that with respect to any Service performed under this Agreement, the liability of UM under this SA is limited to the value of such Service performed as set forth in Exhibit A.

7. Customer shall comply with all applicable laws, rules and regulations applicable to the jurisdiction where the Research Materials and results of Services are in use, including all export and import laws and regulations and shall do nothing to cause UM to violate any such laws, rules and/or regulations.

8. The SA constitutes the entire agreement among the parties as relates to the terms and conditions applicable to the carrying out of the Services to be rendered by UM.
9. Research Materials will be used only for the purpose of the study as stated in this SA. UM assures Customer that the study will be conducted in a manner that does not permit personal identification of parents or students by individuals other than UM employees or contractors with a need to know for the purposes of conducting the Services under this SA. UM shall destroy personally identifiable information disclosed by Customer when that information is no longer needed for study purposes or after three years, whichever comes first, and shall provide Customer with written confirmation when destruction has taken place. Customer will provide UM with the following personally identifiable data points: first name, last name, email address, date of birth, race/ethnicity, sex, undergraduate or graduate student, international student or U.S. citizen/permanent resident, grade point average, in-State vs. out-of-State resident, field of study or degree, and year in school program.

10. Customer shall not use the information contained in the dataset referred to in Exhibit A to identify the individuals whose information is contained in the Research Materials, nor to contact them under any circumstances.

11. This SA shall be effective at the last date of signature, and shall remain effective for a period of one (1) year or until the results are provided to Customer, whichever comes last. The SA may only be amended or extended by a written amendment signed by both parties.

EXHIBIT A

[Description of Services]

The following services will be provided by the study team headed by Daniel Eisenberg at the University of Michigan.

1. The study team will provide administrative assistance and support to the Customer throughout the administration and implementation of the survey. Assistance and support includes answering questions about the survey and survey process, as well as advising and providing help with completing and submitting study materials. Study materials include signed contract, student sample file, study approval (i.e. IRB, Ethics Board, etc.), and survey customizations.

2. The Customer is to provide the study team with proof of study approval from their Institutional Review Board (IRB) or Ethics Board, or proof of exemption before any data collection can occur.

3. The Customer has the opportunity to add no more than ten custom questions to the survey for an extra fee. The Customer must submit custom questions to the study team no later than 2 weeks prior to survey administration in order for the questions to be included in the survey.

4. The Customer is to provide the study team with a data collection sample file in the format requested by the study team no later than two weeks prior to any data collection.

5. The study team will then administer the Healthy Minds Study, a web-based survey, if all study materials have been submitted by the Customer. The survey will be administered between the months of September 2015 to May 2016, starting on a date decided upon by the study team and the Customer.

6. The study team will provide technological support for the survey during data collection.

7. Upon completion of the survey, the Customer will receive a dataset of all de-identified survey responses. The Customer will also receive an electronic report of the findings from both school participants at the Customer’s school and the aggregate findings for all participating schools, as well as five professionally printed, color reports.

8. The Customer will have access to the Interactive Data Interface, operated by the study team, to further explore their data.
**EXHIBIT B**

[**Budget and Payment Schedule**]

The participation fee is due by __________

<table>

¹The ‘Standard Participation Fee’ includes the 3 standard modules and 2 elective modules. All participating institutions receive a customized data set (in multiple file formats), customized data report, access to their data via the Healthy Minds Network data interface, a customized report of the economic case for mental health services based on school-specific survey and administrative data, and on-going research/statistical consultation.

²The standard recruitment sample at each participation institution is 4,000 students. At participating institutions with fewer than 4,000 students, all students are typically recruited. Participating institutions (typically those with ≥8,000 students) may field additional modules by providing 2 or more recruitment samples.

³If an institution provides 2 or more recruitment samples, it may field the same batch of custom questions for each sample at no additional charge ($100 total). If there are 2 or more batches of custom questions, institutions are charged $100 for each additional batch.

4If an institution uses the HMS-CP option, they will be able to receive HMS two times over the span of 2-3 years for one cost of $3,000. Schools will still be charged for custom questions if they decide to include them.

*Institution must be a member of the Jed Campus Program

**Institution must be a member of CCMH

***Institution must be a member of the Jed Campus Program and CCMH

**Pricing for Custom Items**

Up to 10 custom questions= $100.

*Custom items are available at no cost for community colleges.*

**Custom Questions:**
